

Espire™: Protection with a twist!

Other than abstinence, condoms are the single most effective method of preventing sometimes dangerous outcomes of unprotected sexual intercourse such as HIV and sexually transmitted diseases. Unfortunately, the idea that condoms significantly reduce sexual pleasure leads many couples to forego using this method of contraception. Introducing Espire™, a one-of-a-kind seashell-shaped spiral condom that is specially designed to increase sexual pleasure while providing extra protection.

Available in two types - Inspiral and Double Spirals - at RM8.90 for a pack of three at 7-Eleven stores, selected Carix petrol stations and pharmacies.

Fight free radicals with Honey Ocha

Constant weather change and environmental hazards produce free radicals that destroy cells and basically wreak havoc on skin. To protect skin from these harmful substances, antioxidants such as vitamins A, C and E are necessary. SOTHY's has introduced another option to combat free radical damage - Honey Ocha Anti-oxidising Treatment. This treatment contains ingredients like green tea, acacia, honey and Ceylon cinnamon to protect skin from environmental hazards. The treatment is a seven-step process and suitable for all skin types. A one-time first session is available at RM158 (normal price RM220) with complimentary Herbal Green Tea and Honey-Infused Care worth RM88 at 128 Faubourg Salon by SOTHY's and other SOTHY's Salon Partners for a limited time only.
